# SANI+™

Display Terminal and Hand Sanitizer Dispenser

For safety and information...

An indispensable technological element today, SANI+™ is perfectly suited for entrances to public places.
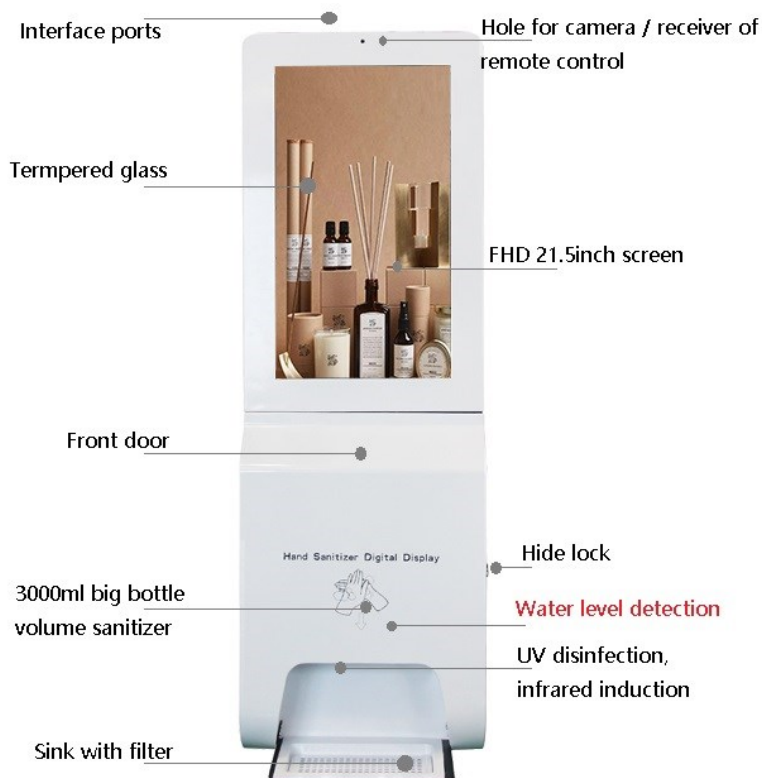

> **Infra-red sensor automatic dispenser**

> **Android 5.1. CMS provided, or from third party**

> **Low level warning by email (API provided for third party CMS)**

> **Easy front maintenance**

> **Large volume tank (3L)**

> **Protective pane made of tempered glass**

SANI+™

Simple and efficient design

Its design combines the diffusion of information or advertisements, as well as the sanitary function required in public places.

> **Interface ports** on the top for easy connection of an SD card, USB stick, or connect via Lan, Wi-Fi or 4G.

> **Tempered glass** to protect the screen

> **3000 ml tank volume**, reduces filling time

> **Liquid level detection**, with possible verification in the CMS.

> **Optional camera**, to obtain information about visitors, and to provide different and targeted advertisements for men, women, children, etc.

> **High Reliability** : High quality metal device, ultra-reliable mechanism

> **Warranty : 2 years**
